

## **COSMETIC COLLAGEN INJECTIONS**

Collagen is actually part of the natural support structure of your skin. Wrinkles form when this natural collagen thins. This loss is mostly a factor of aging, but exposure, pollution, health, heredity, and lifestyle also play roles. Without enough collagen, wrinkles and lines start to form wherever the skin moves. Collagen Replacement Therapy® (using Zyderm® and Zyplast® collagen implants), replenishes the skin's collagen layer, definition to lip borders from the inside out. And results are immediate.

Collagen Replacement Therapy has been proven safe and effective for well over 15 years. Zyderm® and Zyplast® collagen implants are natural products derived from highly purified bovine collagen that is injected just under the surface of the skin. Like your own collagen, your body eventually absorbs this collagen so ongoing treatments are necessary to maintain results. If you discontinue treatments, the new collagen is simply reabsorbed and your face gradually returns to its natural contours.

While healing time varies, many people return to work the same day. People absorb collagen at varying rates, but treatments generally last 3 to 6 months.
